Assignment Name: exercise1chap4

### Error Log Entry

*I did this before the strike, I cannot remember anything. I don't have any of the errors logged, or I just can't remember what I did with them. Sorry :-(.*

What error message did you encounter (if any)?

What unexpected behavior did your program exhibit?

What caused the issue? (e.g., syntax error, logic error, incorrect function usage, etc.)

Include a screenshot of specific lines of code.

How did you fix the issue?

Provide the corrected code or solution using a screenshot.
